### Techkriti'22: IIT Kanpur's annual fest explores new horizons in tech

The Indian Institute of Technology , Kanpur, (IIT-K), hosted the 28th edition of its annual festival Techkriti' 22, which is also Asia's largest technical and entrepreneurship festival, from March 25 to 27 in hybrid (both offline and online) mode

**[ TECHKRITI'22 ]**

## IIT-K's annual fest explores new horizons in tech, biz eco-system

**LUCKNOW :** The Indian Institute of Technology , Kanpur, (IIT-K), hosted the 28th edition of its annual festival Techkriti' 22, which is also Asia's largest technical and entrepreneurship festival, from March 25 to 27 in hybrid (both offline and online) mode.

The prominent participants in this year's event included Nobel laureates, scientists, technocrats and many other dignitaries from various fields. With the theme "Transcending Origins", the prestigious institute offered a platform for the great minds to discuss and explore various crucial aspects of business development, start-ups and entrepreneurial eco-system and ever-evolving technologies.

Faculty coordinator was prof Amitabha Bandyopadhyay, department of biological sciences and bioengineering (BSBE), IIT Kanpur. Prof Abhay Karandikar, director, IIT Kanpur, said,

"Techkriti has been a platform where ideas are exchanged and discussions take shape to take research and innovation one step further. The amalgamated discussions on the old versus the new truly resonate with the theme. This would not only groom future leaders but would also give shape to countless ideas of young entrepreneurs and technology enthusiasts."

There were various talks scheduled for the three-day event where experts from various sectors exchanged ideas and ignited discussions. Speaking on "Road to Techkriti", Bangladeshi Nobel laureate Muhammad Yunus, who was awarded the Nobel Prize for Peace in 2006 for founding the Grameen Bank and pioneering the concepts of microcredit and microfinance, talked about his own idea of creating a "World of Three Zeros."

The three zeroes he talked about are zero carbon emission, zero wealth concentration and zero unemployment.

He urged students to value the nature and work towards preventing global warming. He said the current profit-driven economic system had concentrated the capital in the hands of a few, leaving the economic system to be nothing but a ticking time bomb. He also said the economic slowdown caused due to the Covid pandemic must be reversed.

IIT Kanpur alumnus Gautam Khanna, CEO, PD Hinduja Hospital, in his talk on "Improving healthcare performance through digital transformation" talked about the history and significance of technology in healthcare and that healthcare should be uplified from "sick care" to "healthcare". The three-day event hosted various workshops, competitions and exhibitions along with talks in a dynamic virtual platform.

**LUCKNOW:** The Indian Institute of Technology, Kanpur, (IIT-K), hosted the 28th edition of its annual festival Techkriti'22, which is also Asia's largest technical and entrepreneurship festival, from March 25 to 27 in hybrid (both offline and online) mode.

The prominent participants in this year's event included Nobel laureates, scientists, technocrats and many other dignitaries from various fields. With the theme "Transcending Origins", the prestigious institute offered a platform for the great minds to discuss and explore various crucial aspects of business development, start-ups and entrepreneurial eco-system and ever-evolving technologies.

Faculty coordinator was Prof Amitabha Bandyopadhyay, department of BSRE, IIT Kanpur. Prof Abhay Karandikar, director, IIT Kanpur, said, "Techkriti has been a platform where ideas are exchanged and discussions take shape to take research and innovation one step further. The amalgamated discussions on the old versus the new truly resonate with the theme. This would not only groom future leaders but would also give shape to countless ideas of young entrepreneurs and technology enthusiasts."

There were various talks scheduled for the three-day event where experts from vari-

venting global warming. He said the current profit-driven economic system had concentrated the capital in the hands of a few, leaving the economic system to be nothing but a ticking time bomb. He also said the economic slowdown caused due to the Covid pandemic must be reversed.

Swiss chemist/biophysicist Dr Kurt Wüthrich, who was awarded the Nobel Prize for chemistry in 2002 for developing nuclear magnetic resonance methods for studying biological macromolecules, gave an enlightening talk on "The Molecules of Life: DNA, RNA, and Proteins - History Placed in Perspective." The talk explained in detail about DNA, RNA and protein with anecdotal references.

Thomas Kurian, CEO of Google Cloud, talked about how cloud computing (the on-demand availability of computer system resources, especially data storage (cloud storage) and computing power) evolved from being a software delivery system to its current form over the past 20 years.

He said initially it was made for the convenience of companies, reducing their need to maintain a high-end technological infrastructure, but the second generation of cloud computing was based much more on infrastructure. It is now quintessential across sectors. Amit Agarwal from NoBroker and Rizwan Koita from Citius Tech highlighted their journeys and

IIT Kanpur explored new horizons in technology, business eco-system with Nobel laureates

March 29, 2022, 6:53 pm

Kanpur, March 29 (UNI) IIT Kanpur hosted the 28th edition of Asia's largest technical and entrepreneurship festival, Techkriti'22 from March 25 to 27. The annual fest of IIT Kanpur witnessed the presence of 2 Nobel laureates, scientists, technocrats, and many other dignitaries from various fields, this year. With the theme "Transcending Origins", IIT Kanpur offered a platform for the great minds to discuss and explore various crucial aspects of business development, startup and entrepreneurial eco-system, and ever-evolving technologies. "IIT Kanpur always strives to enrich the research and development pool to cater to diverse areas. Techkriti has been a platform where ideas are exchanged and discussions take shape to take research and innovation one step further," Abhay Karandikar, Director IIT Kanpur, said here in a statement. This year also, with Nobel laureates and experts coming from various sectors, we are proud to explore new and emerging territories of business development, startup eco-system and the fast-changing world of technology. The amalgamated discussions on the old versus the new truly resonate with the theme "Transcending Origins". This would not only groom future leaders, but also would give shape to countless ideas of young entrepreneurs and technology enthusiasts." Speaking in the event titled "Road to Techkriti", Bangladeshi Nobel laureate Muhammad Yunus, who was awarded the Nobel Peace Prize for founding the Grameen Bank and pioneering the concepts of microcredit and microfinance, talked about his own idea of creating a "World of Three Zeros." The three zeroes he talked about are zero carbon emission, zero wealth concentration, and zero unemployment. He urged to value Nature and to work towards preventing global warming. He said that the current profit-driven Economic system has concentrated the capital in the hands of few, leaving the economic system to be nothing but a ticking time bomb. He also added that the economic slowdown due to COVID must be reversed. Swiss chemist/biophysicist Kurt Wüthrich, who was awarded the Nobel Prize in Chemistry for developing nuclear magnetic resonance methods for studying biological macromolecules, gave an enlightening talk on "The Molecules of Life: DNA, RNA, and Proteins - History Placed in Perspective." The talk explained in detail about DNA, RNA, and protein, with anecdotal references.

न्यूल डेस्क, अमर उजाला, कानपुर Published by: हिमंशु अदस्थी Updated Mon, 28 Mar 2022 62:49 PM IST

सार

कोरोना महामारी के बाद से ही अन्य प्रकार के रोगों और स्वास्थ्य समस्याओं का खतरा बरकरार है। ऐसे में चिकित्सकों, नर्सिंग स्टाफ और टेक्निशियंस की मांग बढ़ी है। लेकिन देश का मेडिकल सेक्टर स्टाफ की कमी से जूझ रहा है।

What makes a  
Venture Capitalist  
Tick : Success as a VC

25 March

12:00 PM

techkriti.iitk • Following

**techkriti.iitk** A venture capitalist (VC) is an investor who supports a young company in the process of expanding or provides the capital needed for a startup venture. A venture capitalist is willing to invest in such companies because the potential return on investment (ROI) can be significant if the company is successful. But what makes the venture capitalist successful? To answer such questions Techkriti'22 has invited Parag Dhol (Managing Director at Inventus India), Sandeep Singhal (Senior Advisor at NexusVP and Avaana Capital), Anant Vidur Puri (Partner at Bessemer Venture Partners) to share their knowledge with us. Don't forget to set your alarm for a worth listening panel discussion on 25th March, 12 PM

### Ankit Prasad

Founder and CEO, Bobble AI

Topic:  
Not giving up -  
In search of the  
next new idea

 26 March  
 4:15 PM

techkriti.iitk • Following

 **techkriti.iitk** Working for yourself and working for what you believe in is something very unique about entrepreneurship. A wanna-be entrepreneur may come across many questions that make the very decision of becoming an entrepreneur difficult. The first question among those many questions is - what should be the idea on which the startup will be based. Many young entrepreneurs give up in search of the idea only.

To motivate the young entrepreneurs and push them above giving up in search of the answers to various questions they face while on the journey as an entrepreneur, we have Mr. Ankit Prasad, founder and CEO at Bobble AI.

Bobble AI is a conversation Media Platform, enriching everyday conversations with expressive and personalized content including stickers, GIFs and emojis, deep localization with over 100 languages, AI-based contextual recommendations, speech-to-text, and much more, Bobble AI is transforming conversations of over 30 million users and counting!

CEO of Google Cloud

techkriti Google Cloud Platform is a suite of public cloud computing services offered by Google. The platform includes a range of hosted services for compute, storage and application development that run on Google hardware. What it takes to become a CEO of such a large organization, To reveal this, we have with us Mr. Thomas Kurian, CEO of Google Cloud, to discuss his inspiring journey with us, which is definitely a motivation for the millions of youth on this planet. Don't Forget to join this fruitful session, which can be a life-changing boon for you all, on 26th March 10AM.

techkriti.iitk Have you ever thought of transforming online courses into a game?  
The gamification of education can enhance levels of students' engagement similar to what games can do to improve their particular skills and optimize their learning.  
On the other hand, scientific studies have shown adverse outcomes

techkriti.iitk Digital transformation is a new way to deliver care, improve processes, and meet the well-being needs of consumers. To enlighten us about improving Healthcare performance through digital transformation, we have IITK alum, Mr Gautam Khanna, CEO of the PD Hinduja Hospital and Medical Research Centre and Head of the Hinduja College of Nursing, Mumbai.  
So be ready to have a beneficial session with him on. This could be a mind blowing experience.

techkriti.iitk Who am I? What am I? How do I think all this and how am I aware of myself and things around me? Is that thing also able to do so? These are some of the many questions that humans have been pondering about continuously since the dawn of their race. The question has essentially remained same, however, the scope of this question has changed a lot overtime, especially in this age of information.  
In this age, the implication of this question on the field of AI is one of the most explored topics in pure science, engineering as well as sci-fi. Techkriti'22 invites writer and psychologist Dr. Susan Blackmore, with IIT Kanpur's Prof. Nisheet Srivastava (CSE dept.) and Prof. Arnab Bhattacharya (CSE dept.) to discuss more on this with us on 27th March. The discussion will be moderated by Prof. Devpriya Kumar (HSS Dept., IITK). So buckle up and mark your calendars for this session.
